The University Medical Center Hamburg-Eppendorf (UKE) is one of Hamburg’s largest hospitals, with roughly 90,000 inpatients and another 435,000 outpatients annually. Research at the UKE focuses on areas such as neurosciences, existing disorders, disease, infection/inflammation, and health care research. Further important research fields are rare congenital metabolic diseases, transplantation/lymphotax cell therapy, and molecular cell biology. Campus research covers numerous areas with excellent working conditions. Further research initiatives are currently underway.

**Modern, practice-oriented teaching**

The UKE provides practical and patient-oriented training to roughly 3,000 students, primarily in human medicine and dentistry. The basis is the integrated medical degree program (IMD-Program). Instruction in patient care takes place in the state-of-the-art New Clinic, while the new Medical Education Campus provides optimal learning and residing conditions.

The Medical Skills Training Center (MediTreff), which houses models and computer-controlled simulators, is the birth simulator, provides students with the opportunity to study and test their skills in completely new ways.

**KNOWLEDGE FOR ALL**

Universität Hamburg is an important source of inspiration and knowledge to Hamburg. Since its founding in 1919, it has engaged in close exchange with the public and with other institutions. Numerous offers play a central role in attracting interest in science and becoming a part of the region.

These include public lectures in lecture halls, pubs, and unusual places throughout the city. The Children’s University involves local projects, school laboratories, and science projects, the University Museum, exhibitions, and viewing collections, and open house days and the Night of Knowledge.

Universität Hamburg, as a place of lifelong learning, also provides countless opportunities for continuing education for professionals and personal purposes. With the Open Study Program students can choose their own areas. An internet portal enables the public to search for all public University offers by target group, field, and format.

PROVIDING OUTSTANDING SCIENCE AND SCHOLARSHIP

Universität Hamburg is committed to sustainable science and education. It is focused on the “triple bottom line” for future-oriented, high-quality education for women such as excellence, research, teaching, knowledge exchange, administration, and multifaceted knowledge services.
AN INTERNATIONAL AND SUSTAINABLE APPROACH TO STUDY

Studying at Universität Hamburg means becoming a confident and independent human being, shaped by sustainable academic training and the principles of research-based learning. The principle of sustainability is not just a subject of study but also a hallmark of teaching and studies.

In addition to traditional subjects such as teaching, law, economics, medicine and mathematics, Universität Hamburg also offers degree programs that are unique in Germany, such as sign language, international criminal law, and marine ecosystem and fisheries science.

A total of 26 English-language and German-English language master’s programs—such as Health Economics and health Care Management, Politics, Economics, Philosophy, and Integrated System Sciences—are also on our network of 350 universities in over 50 countries where students can gain international experiences—as well as our network of 300 universities in over 50 countries where students can gain international experiences.

In research, studies, and administration, the University maintains strategic partnerships and cooperation and also serve to attract highly qualified doctoral and early career researchers. The Hamburg Research Academy (HRA) is a cross-faculty and cross-university platform under the aegis of Universität Hamburg. It coordinates and develops doctoral training, and dual and joint degree programs; they ensure quality training for doctoral and early career researchers seeking attractive skills.

RESEARCH

Support for early career researchers
Universität Hamburg grants special value on support for early career researchers. The Hamburg Research Academy (HRA) offers a cross-faculty and cross-university platform under the aegis of the University. HRA supports and promotes research projects and offers services at Hamburg universities. In conjunction with its doctoral and early career researchers, HRA ensures quality training for doctoral and early career researchers seeking attractive skills.

More information:
www.uni-hamburg.de/en/forschung/forschungsprofil

RESEARCH COOPERATION

Networked knowledge promotes innovation. Researchers at Universität Hamburg cooperate in numerous centers and alliances. Their work is interdisciplinary, open and flexible, and involves cooperation with universities research institutes.

The following are examples:

The Carl Friedrich von Weizsäcker Center for Science and Peace Research (ZNF)

Center for Free-Electron Laser Science (CFEL)

Center for Earth System Research and Sustainability (CEN)

Center for Structural Systems Biology (CSSB)

Center for Hybrid Nanostructures (CHyN)

International Research Projects

In research, studies, and administration, the University maintains strategic partnerships and cooperation and also serve to attract highly qualified doctoral and early career researchers. The Hamburg Research Academy (HRA) is a cross-faculty and cross-university platform under the aegis of Universität Hamburg. It coordinates and develops doctoral training, and dual and joint degree programs; they ensure quality training for doctoral and early career researchers seeking attractive skills.
