Introduction

The Master's program in Mathematical Physics is a joint program of the Department of Mathematics and the Department of Physics at Hamburg University. It is complemented by contributions from leading scientists of the Theoretical Physics Group at DESY, one of the world's leading centers for the investigation of the structure of matter.

The Master's program in Mathematical Physics is a research oriented program geared towards fundamental research at the interface of mathematics and physics. Its participants acquire familiarity with the fundamental concepts of modern theoretical physics as well as proficiency in pure mathematics. Ideally, graduates of the program are able to understand current research in theoretical physics as well as to work actively with advanced mathematical concepts and structures.

Admission requirements

University degree

For the Master's program in Mathematical Physics you need to have accomplished a Bachelor's degree in Mathematics or Physics. The content of this degree must be comparable to the Bachelor's degree in Mathematics (with Physics as subsidiary subject) or Physics from the University of Hamburg. Please have a look at the Scientific Prerequisites on our website:

If you have not received your degree certificate yet, you can submit this by the end of the first semester of your master's program. Please see the “Documents to submit” section below for details.
Additional special admission requirements

Your proficiency in English will be considered as proven if at least one of the following applies to you:

(a) You have passed a test within CEFR/TELC at level B2

or

(b) You have passed the IELTS test with a score of at least 5.0

(c) You have passed the TOEFL test with 72 credits in the internet-based test (TOEFL iBT)

(d) You have passed Cambridge FCE, CAE, or CPE

(e) You have a degree from an English language bachelor degree program

(f) You have a high school diploma accepted at English language universities

(g) You have spent at least 6 months in an English speaking country

(h) You have learnt English at a German-language school for at least seven years.

For details of the legal basis for this regulation, please see the admission bylaws for your chosen degree program: www.uni-hamburg.de/zugang-master

Recognition of transcripts for degree programs completed at foreign higher education institutions

If you obtained your first degree abroad, your certificate will be reviewed during the application procedure in the Faculty of Mathematics, Informatics and Natural Sciences, Department of Mathematics.

If your degree certificate is not in English or German, please include a copy of a certified English or German translation of this together with your application documents.

Application

Online application

You will need to complete the online application available on Universität Hamburg’s application portal during the application period: www.uni-hamburg.de/online-application. Please create a user account, enter your information online, and submit your application electronically. You will then need to save your online application and to submit it together with the following documents to the application E-mail-address indicated below.

Documents to submit

Please submit a PDF containing all documents per mail to: bewerbung.math@uni-hamburg.de. For documents not issued in English or German, an electronic copy of a certified English or German translation is required.
We recommend that you be able to follow courses and seminars in English as well as in German.

- **Print out of your online application**

- **Degree certificate or provisional Transcript of Records**
  If you are still studying when you apply and cannot yet provide a final certificate containing your grades, please submit your current Transcript of Records confirming your provisional grade point average. You will then need to submit your degree certificate by the end of the first semester of your master’s program.
  The content of this degree must be comparable to the Bachelor’s degree in Mathematics (with Physics as subsidiary subject) or Physics from the University of Hamburg. Please have a look at the **Scientific Prerequisites** on our website: [https://www.math.uni-hamburg.de/en/studium/master/msc-mathematicalphysics/bewerbung.html](https://www.math.uni-hamburg.de/en/studium/master/msc-mathematicalphysics/bewerbung.html)

- **Current transcript of records with grade point average**

- **Curriculum vitae**

- **Copy of your higher education entrance qualification** (i.e. High School diploma or equivalent). Copies in English or German are accepted. If your diploma is in another language, please enclose a certified translation.

- **Short personal statement** (about one page): What do you like about mathematics? What interests you most? What are you hoping to achieve in your course?

- **Your proficiency in English** will be considered as proven if at least one of the following applies to you:
  
  (a) You have passed a test within CEFR/TELC at level B2
  
  or
  
  (b) You have passed the IELTS test with a score of at least 5.0
  
  (c) You have passed the TOEFL test with 72 credits in the internet-based-test (TOEFL iBT)
  
  (d) You have passed Cambridge FCE, CAE, or CPE
  
  (e) You have a degree from an English language bachelor degree program
  
  (f) You have a high school diploma accepted at English language universities
  
  (g) You have spent at least 6 months in an English speaking country
  
  (h) You have learnt English at a German-language school for at least seven years.

We recommend that you be able to follow courses and seminars in English as well as in German.
Application address

bewerbung.math@uni-hamburg.de

Please note that your application can only be considered if your complete application documents reach the application address by the application deadline. This deadline is final; no extensions can be granted.

Please combine your documents into one single PDF.

If you want to submit an additional special application (e.g., hardship application), you will need to send this directly to the Application and Admissions Team (Team Bewerbung und Zulassung) together with the required proof separately from the application documents indicated above by the application deadline. For more information on special applications, please see www.uni-hamburg.de/sonderantrag and www.uni-hamburg.de/info-master.

Selection criteria

If the number of applicants exceeds the number of places available, a selection procedure will be necessary:

a) grade of your bachelor's degree and length of studies

b) relevant qualifications or work experience for the Master's program in Mathematical Physics

c) other qualifications, e.g. international experience or grade of your higher education entrance qualification

d) personal statement

For details of the legal basis for this regulation, please see the selection bylaws for your chosen master’s program: www.uni-hamburg.de/auswahl-master
Admission and enrollment

Once your application has been reviewed, an acceptance or rejection letter will be made available in your STiNE account under the Dokumente (Documents) tab. Please see the information at www.uni-hamburg.de/online-application. An enrollment deadline will be indicated in your acceptance letter—please submit the documents required for enrollment to the Application and Admissions Team (Team Bewerbung und Zulassung) by this date. Detailed information about the enrollment process is provided at www.uni-hamburg.de/masterenrollment.

List of comparable degree programs

Mathematics M.Sc. (taught completely in English):
You have to provide evidence of academic achievement with at least 90 Credit Points obtained through Mathematics subjects or subjects with a strong mathematical content in a Bachelor degree program in Mathematics or other related areas like Industrial Mathematics or Engineering Science (with specialization or complementary subjects in Mathematics). The admissions committee proves comparability of your studies after submitting application.

Technomathematik M.Sc. (taught completely in English):
You have to provide a Bachelor’s degree in Industrial Mathematics, Mathematics (with specification in Engineering), Engineering (with specification in Mathematics) or equivalent. You are eligible, if you can prove that you have gained at least 90 credit points in mathematical courses with engineering specification or engineering courses with mathematical specification, respectively.
