

Universität Hamburg

DER FORSCHUNG | DER LEHRE | DER BILDUNG

The Faculty of Mathematics, Informatics and Natural Sciences, Department of Physics, II. Institute for Theoretical Physics invites applications for a

RESEARCH ASSOCIATE FOR THE PROJECT “CLUSTER OF EXCELLENCE QUANTUM UNIVERSE” QT1B: HIGHER-DIMENSIONAL HIGGS MODELS - SALARY LEVEL 13 TV-L -

The position in accordance with Section 28 subsection 3 of the Hamburg higher education act (Hamburgisches Hochschulgesetz, HmbHG) commences **in fall 2019**.

This is a fixed-term contract in accordance with Section 2 of the academic fixed-term labor contract act (Wissenschaftszeitvertragsgesetz, WissZeitVG). The term is fixed for a period of 3 years. The position calls for 26 hours per week.

RESPONSIBILITIES:

Duties include academic services in the project named above. Research associates may also pursue independent research and further academic qualifications.

SPECIFIC DUTIES:

The Cluster of Excellence “Quantum Universe” performs research to understand mass and gravity at the interface between quantum physics and cosmology. The research team includes leading scientists from mathematics, particle physics, astrophysics, and cosmology at Universität Hamburg and DESY.

The doctoral student will work at the frontier between string theory and particle phenomenology and look for insights on the origin of the weak scale. Within the Standard Model, this scale of electroweak symmetry breaking is an arbitrary parameter. The goal of this project is to study some Standard Model completions at higher energy where this scale can be related to other parameters, like the size of some extra space dimensions and the scale of condensate of new strongly interactions condensates. In particular, the phenomenological consequences of the weak gravity conjectures on these models will be examined.

Doctoral research associates will become members of the Quantum Universe research school (QRS) and through this receive offers for academic training, soft skills, and career planning. In addition, they will receive individual budgets, meant to enable them to attend summer schools, conferences or other educational and supporting measures. Additional travel money for project-specific duties will be made available via the hosting research groups. Doctoral research associates may actively participate in the organization of the Cluster via an early career council.

REQUIREMENTS:

A university degree in a relevant field.

The University aims to increase the number of women in research and teaching and explicitly encourages women to apply. Equally qualified female applicants will receive preference in accordance with the Hamburg act on gender equality (Hamburgisches Gleichstellungsgesetz, HmbGleiG).

Qualified disabled candidates or applicants with equivalent status receive preference in the application process.

For further information, please contact Prof. Dr. Jan Louis (+49 40 42838-4476, jan.louis@uni-hamburg.de), Prof. Dr. Christophe Grojean (+49 40 8998-3148, christophe.grojean@desy.de), or consult our website at www.qu.uni-hamburg.de.

Applications should include a cover letter, a tabular curriculum vitae, copies of degree certificate(s), and at least two letters of recommendation. Please submit applications by **1 March 2019** via the following portal: <https://ias.desy.de/pls/apex/f?p=293:1:0:>. In case of problems, they can also be sent by email to phd-app-particle-th19@desy.de. Later applications are considered until the position is filled.
